

Fully Automated Collection

A system which utilizes advanced collection technology and specially designed carts in order to safely and efficiently collect curbside solid waste.

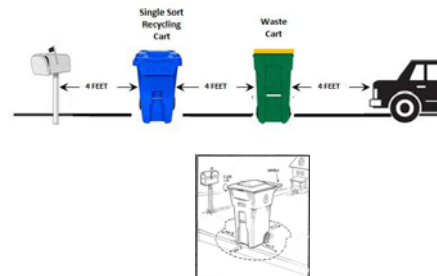

Each residence is provided a 95-gallon cart at no cost. Customer may get a smaller cart, or pay an annual fee for an additional cart.

Carts are designed to hold typical household waste.

Carts are placed curbside on collection day

4 feet of space will be required between the cart and parked cars, mailboxes, and other objects

Collection trucks are equipped with a mechanical arm to empty the carts

System works well in snowy areas, large wheels move easily through snow.
