

Preventive care is an essential part of managing chronic conditions

And it's just ONE of the services we provide at the onsite Racine Employee Health & Wellness Center

Certain diseases and conditions may not have symptoms. Checkups help identify issues early before they can become a problem.

Your care team at the Health & Wellness Center will develop a customized wellness plan to:

- Help you identify health risk factors
- Provide education about positive health changes
- Offer confidential, convenient health services

All at no or low cost to you!
